

3. WebApi_Handson

Output:

A terminal window titled "MyFirstWebApi — -zsh — 80x44" with a tab labeled "...ebApi — MyFirstWebApi < dotnet run". The terminal shows the output of three curl commands. The first command returns a 400 Bad Request. The second command, with an Authorization header, also returns a 400 Bad Request. The third command, with a Bearer token, returns a 200 OK and a JSON response. The JSON response contains employee data: [{"id":101,"name":"Alice Smith","salary":75000,"permanent":true,"department":{"id":1,"name":"IT"},"skills":[{"id":10,"name":"C#"}, {"id":11,"name":"Web API"}], "dateOfBirth":"2000-05-15T00:00:00"}, {"id":102,"name":"Bob Jones","salary":85000,"permanent":false,"department":{"id":2,"name":"HR"},"skills":[{"id":12,"name":"Recruiting"}], "dateOfBirth":"1998-11-01T00:00:00"}].
